OCI Funding Closes Sept 30, 2026 — Apply by Aug 31

CRITICAL
INDUSTRIAL
TECHNOLOGIES

The Opportunity

This is the moment for Ontario builders.

The construction industry is at an inflection point. AI is already reshaping how projects are estimated, scheduled, and delivered — and the leaders who prepare their teams now will shape the pace for years to come.

Most builders haven't formalized an AI strategy yet. That's completely normal. AI is new to construction, and there's no playbook yet. The important thing is that you're thinking about it — and that puts you ahead of where most organizations are.

THE CHALLENGE

60% of leaders don't know where to start with AI.

And among those using AI tools today, more than half received zero formal training. That's not a technology problem — it's a people opportunity. Every organization that builds genuine AI capability into its workforce right now earns a real and lasting advantage.

THE FUNDING

The Ontario government is investing in your readiness.

Through the Ontario Centre of Innovation (OCI), the CIT Future Ready program covers 50% of eligible AI training costs — specifically designed for construction-sector leaders who are ready to take the first step.

OCI's funding window for this round closes September 30, 2026. With four weeks of delivery built in, August 31 is the last date to start and still complete in time to claim funding.

WHY BLUEPRINTAI — WHY NOW

AI adoption is a people opportunity, not a technology problem. You need a partner who has done the homework on your industry, speaks plain language, and starts with your team — not a sales pitch for software. BlueprintAI is that program, built specifically for Ontario's construction leaders, and half-funded by the Ontario government.

THE LEAN BUILDER'S REALITY — WHY THIS MATTERS

When your front office has fewer than 200 people, you don't have the luxury of an IT department. Your team wears ten different hats while juggling Tarion demands, strict payment clocks, and shifting supplier pricing. BlueprintAI isn't about replacing your people with software — it's about giving your existing accounting team and project managers the capacity to handle twice the volume without burning out or quietly losing the margin you worked hard to earn.

Your AI Readiness Journey

BlueprintAI follows StilwaterAI's proven journey framework — a structured path from gut-feel guesswork to a confident, AI-assisted back office. We meet you where you are and move forward together, one practical step at a time.

This is not a collection of three separate services bundled together. It is one complete program. Within BlueprintAI, your organization gains three core capabilities — delivered across a focused, four-week timeline.

PHASE 1 — AI Awareness · Demystify AI

PHASE 2 — AI Readiness & Mapping · Prepare your team. Map your opportunity.

PHASE 3 — AI Build & Deploy · Build the right AI assistants with confidence.

BlueprintAI moves your organization through Phases 1 and 2 — with Phase 3 fully set up for a smooth, confident launch the moment you're ready.

Why Embrace AI? - Three Possibilities

Below are three capabilities that can be empowered if they're right for your organization. The **AI Assistant Identification and Prioritization** service included in this program will identify and rank potential assistants tailored specifically to your company .

CAPABILITY 1

Accelerated Field-to-Office Reporting

Unlock faster revenue realization by eliminating the lag between field activity and office documentation. By adopting AI-driven, voice-to-text workflows, your firm could gain the capacity to turn site diaries and change orders into billable reality the moment they happen. This isn't just about faster typing; it's about giving your project managers and site supers the toolset to keep projects on schedule and margins intact, reducing the administrative drag that kills field productivity.

CAPABILITY 2

Cash Flow & Prompt Payment Defense

Eliminate the administrative bottlenecks that threaten your cash position. We can help you implement AI-assisted billing workflows that automatically cross-reference trade invoices against your site records and purchase orders. This creates a rigorous, reliable defense for your cash flow, ensuring you stay compliant with Ontario's Prompt Payment timelines by removing the manual errors and delays that invite statutory penalties.

CAPABILITY 3

Institutional Knowledge & Bid Strategy

Stop relying on 'gut-feel' estimates and transform your messy historical data into a strategic competitive advantage. We can help your team build a secure, private pipeline that enables your estimators to query past project costs, sub-trade inflation, and margin drift. You gain the ability to make data-backed bid decisions, supported by a governance framework that protects your sensitive bid agreements and firm data.

Your Investment

Ontario’s construction leaders deserve access to world-class AI readiness — and the Ontario government agrees. Through OCI’s CIT Future Ready program, half of your investment is covered.

Investment	Amount
Full Program Investment (up to 15 people, online delivery)	\$8,996
OCI CIT Future Ready Funding (50% reimbursement)	- \$4,498
Your Net Investment	\$4,498

Base program covers up to 15 people (online delivery). For larger organizations requiring additional training tracks, pricing scales by \$4,000 per additional session. Contact us to discuss.

THE RETURN, IN PRACTICE

Here’s what this looks like for one person on your team. Say an office administrator or estimator earns \$60,000 a year. If AI support makes them just 10% more productive — a modest, conservative gain — that’s \$6,000 in value back to your organization annually. Against a net investment of \$4,498, that’s payback in under nine months, from one person. BlueprintAI is built for a team of up to 15.

How OCI Funding Works

- 01

Qualify

Your organization is Ontario-based in the construction sector, with fewer than 500 employees and a valid CRA business number. That’s the baseline.
- 02

We Guide Your Paperwork

StilwaterAI guides you through every piece of OCI documentation and provides a letter of support as your Authorized Future Ready Service Provider. OCI requires the application to come directly from you — we make sure you're never doing it alone.

03

You Apply, With Us Beside You

Every OCI application starts with a conversation with an OCI Business Development Manager. We guide you through that conversation and the full online application — from start to submission.

04

OCI Reimburses 50%

After program completion, OCI reimburses 50% of eligible costs directly to your organization (up to a maximum of \$10,000).

OCI FUNDING WINDOW — CLOSES SEPTEMBER 30, 2026

OCI's CIT Future Ready funding window for this round closes September 30, 2026. BlueprintAI runs four weeks start to finish, so August 31 is the last date to start a cohort and still complete — and claim your funding — before the window closes. Government funding windows open for a season, not indefinitely — worth building into your plan now.

ABOUT THE PROGRAM

The Critical Industrial Technologies (CIT) initiative is delivered by the Ontario Centre of Innovation (OCI) on behalf of the Government of Ontario, helping Ontario small and medium enterprises adopt critical technologies — including AI — across Advanced Manufacturing, Agri-Food, Construction, and Mining. OCI brings industry, academic, and government partners together to invest in the technology development that drives Ontario's economy forward. Learn more at CITinnovation.ca and oc-innovation.ca.

Why StilwaterAI

We're not a training vendor. We're not a software company. We are an AI Leadership firm — a partner who walks alongside you as you build the confidence and capability to thrive with AI. There is a meaningful difference, and it shows in how we work.

→ **Human-First, Always.** Every engagement starts with your people — before any technology recommendation is made. We assess readiness, build confidence, and ensure your team is genuinely equipped. AI adoption is a people opportunity, and we treat it that way from day one.

→ **Authorized Future Ready Service Provider.** StilwaterAI is an approved supplier of AI Future Ready Services under the Ontario Centre of Innovation's programs. We know the funding process inside and out — and we guide you through every piece of documentation, line by line. (OCI requires the application to come directly from you, so we make sure you're never figuring it out alone.)

→ **Outcomes, Not Outputs.** We measure success by your results — increased productivity, reduced costs, improved team effectiveness, and people who feel more capable and confident in their work. Every engagement is designed with that in mind.

→ **Canadian. Ontario-Based. Construction-Ready.** Headquartered in Huntsville, Ontario. We understand the Canadian business landscape, Ontario's regulatory environment, and the specific challenges facing construction leaders right now. We are building here too.

→ **Responsible by Design.** Every AI assistant we build includes human oversight at the moments that matter. Security-first architecture. Governance documentation included. We do not build tools we would not trust with our own business.

What Builders Are Saying

★★★★★ **5.0** on Google — real reviews from real clients

"This bootcamp delivered genuinely valuable insight into human-centered AI approaches we can apply immediately. The training went well beyond theory, using real-world case studies that made the concepts practical and actionable."

— [Timeagility Consulting](#), [Google review](#)

"Jason and Aaron were fabulous trainers. Their experience and energy made the day fly by."

— [Erika Scott, JigSavvy](#) · [Google review](#)

"The sessions were clear, well-structured, and very approachable, even for beginners. I especially appreciated the hands-on component."

— [Kristin Newman, Stratton Homes](#) · [Google review](#)

"One of the most useful workshops I've ever attended. So many excellent takeaways."

— [Andrew Wagner-Chazalon](#), [Google review](#)

THE STILWATERAI DIFFERENCE

"We don't just train you — we walk alongside you as a partner. When you're done with BlueprintAI, your team is genuinely ready, your roadmap is built from your own workflows, and your governance foundation is solid. That's not a deliverable. That's a capability your organization owns."

Next Steps

Three simple steps to AI readiness — with government funding support every step of the way. StilwaterAI guides you through all of it.

0
1

Book a Discovery Call

A relaxed, no-pressure conversation about your business, your team, and where AI might fit. We listen first. No jargon, no sales pitch — just a genuine conversation between leaders.

0
2

We Assess Your Readiness Together

Together, we evaluate where your organization actually stands and map the path forward. Clarity before complexity — always. We do the homework on your business so you don't have to explain your world to us.

0
3

You Apply, We Guide Every Step

StilwaterAI guides your documentation and provides the letter of support — then your application goes to OCI directly from you, as their process requires. We're beside you the whole way, then we get to work on BlueprintAI.

READY TO GET STARTED?

Book your discovery call at stilwater.ai or reach Jason directly at jason@stilwater.ai. OCI's funding window closes September 30, 2026 — with four weeks of delivery built in, August 31 is the last date to start and still finish in time to claim funding. Worth getting on the calendar now.
